

ABSTRACT

Despite the rapid escalation of cyber threats, there has still been little research into the foundations of the subject or methodologies that could serve to guide Information Systems researchers and practitioners who deal with cyber security. In addition, little is known about Crime-as-a-Service (CaaS), a criminal business model that underpins the cybercrime underground. This research gap and the practical cybercrime problems we face have motivated us to investigate the cybercrime underground economy by taking a data analytics approach from a design science perspective.

To achieve this goal, we propose (1) a data analysis framework for analyzing the cybercrime underground, (2) CaaS and crime ware definitions, and (3) an associated classification model. In addition, we (4) develop an example application to demonstrate how the proposed framework and classification model could be implemented in practice. We then use this application to investigate the cybercrime underground economy by analyzing a large dataset obtained from the online hacking community. By taking a design science research approach, this study contributes to the design artifacts, foundations, and methodologies in this area.

Moreover, it provides useful practical insights to practitioners by suggesting guidelines as to how governments and organizations in all industries can prepare for attacks by the cybercrime underground market where illegal services are provided to help underground buyers conduct cybercrimes, such as attacks, infections, and money laundering in an automated manner". Thus, CaaS is referred to as a do-it-for-me service, unlike crimeware which is a do-it-yourself product. Because CaaS is designed for novices, its customers do not need to run a hacking server or have high-level hacking skills.

ABSTRACT	II
LIST OF CONTENTS	III
LIST OF FIGURES	VI
LIST OF TABLES	VII
LIST OF SNAPSHOTS	VIII

LIST OF CONTENTS

CHAPTER 1	INTRODUCTION	01
1.1	Domain Overview	01
1.2	Project Overview	01
1.3	Existing System	02
1.4	Drawbacks of Existing System	02
1.5	Problem Statement	03
1.6	Project Scope & Motivation	04
1.7	Proposed System	04
1.8	Advantages of Proposed System	05
1.9	Objective of the Project	06
1.10	Organization of report	06
CHAPTER 2	LITERATURE SURVEY	07
2.1	Literature Review	07
2.2	Conclusion of Review	09
CHAPTER 3	SYSTEM REQUIREMENT SPECIFICATION	10
3.1	Introduction	10
3.2	Functional Requirement	11
3.3	Non - Functional Requirement	11

3.4 System Requirements	13
3.4.1 Hardware Requirements	13
3.4.2 Software Requirements	13
CHAPTER 4 SYSTEM DESIGN	15
4.1 Introduction to System Design	15
4.2 High Level Design	15
4.2.1 Architecture of the System	16
4.2.2 Data Flow Diagram	17
4.3 Low Level Design	18
4.3.1 Flow Chart	18
4.3.2 Sequence Diagram	19
4.3.3 Use Case Diagram	20
4.3.4 Activity Diagram	21
CHAPTER 5 SYSTEM DEVELOPMENT	22
5.1 Introduction to System Development	22
5.2 Module & Methodology	23
5.2.1 Sub Module1	23
5.2.2 Sub Module2	24
CHAPTER 6 SYSTEM IMPLEMENTATION	25
6.1 Introduction to System Implementation	25
6.2 Language Used for Implementation	25
6.3 Algorithms	26
6.4 Code Snippet	27

CHAPTER 7	TESTING	29
7.1	Introduction to Testing	29
7.2	Types of Testing	29
7.3	Test Cases	30
CHAPTER 8	RESULTS AND DISCUSSIONS	32
8.1	Snapshots with Description	32
CONCLUSION AND FUTURE ENHANCEMENT		36
